Selecting images for your region via Image Picker on AntWeb:

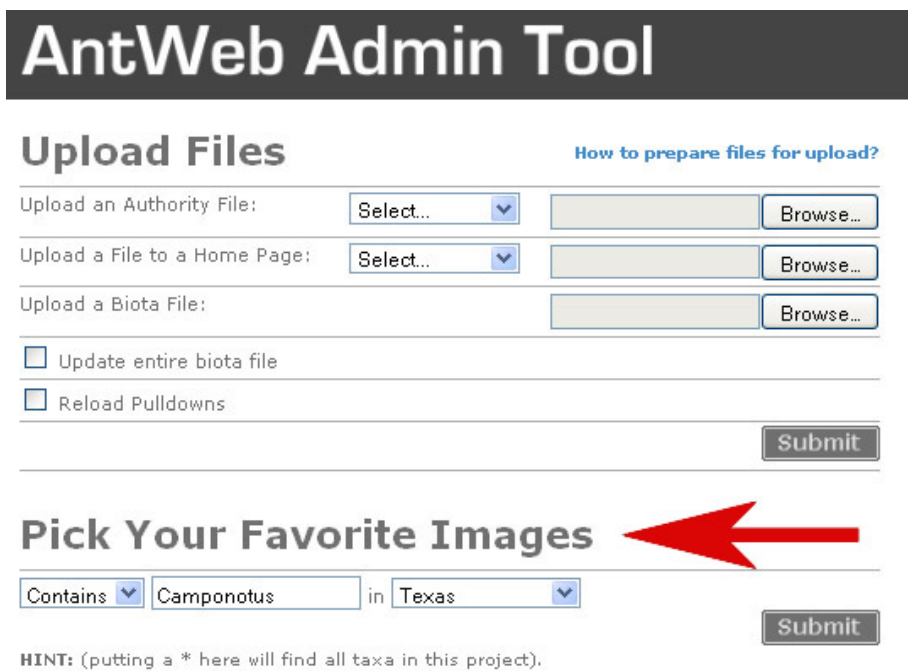

Regional Curators can choose the images of specimens to appear on regional taxon pages and field guides with the Image Picker tool.

1. Login to the AntWeb Admin Tools page.

The screenshot shows the 'AntWeb Admin Tool' header in a dark grey box. Below it, the text 'Please Login to AntWeb' is displayed. There are two input fields: 'Username:' and 'Password:'. The password field contains six dots. A 'Submit' button is located to the right of the password field.

2. From the pulldown menu under the Pick Your Favorite Images header, select your region and genus to find images.

The screenshot shows the 'AntWeb Admin Tool' header. Below it, the 'Upload Files' section is visible, with a link 'How to prepare files for upload?'. There are three rows for uploading files, each with a 'Select...' dropdown and a 'Browse...' button. Below these are two checkboxes: 'Update entire biota file' and 'Reload Pulldowns'. A 'Submit' button is at the bottom of this section. The 'Pick Your Favorite Images' section is highlighted with a red arrow. It features a 'Contains' dropdown, a text input field containing 'Camponotus', and an 'in' dropdown containing 'Texas'. A 'Submit' button is to the right. A 'HINT:' note is at the bottom: '(putting a * here will find all taxa in this project)'.

- a. **OR** put an asterisk in the genus field to obtain all taxa for that region and click **Submit**.

- Click on each species name to pull up available images, and click on a specimen image to represent species for your region.

341 Results for *

To select a favorite image, click on the name, and then click on the thumbnail in the choices that will show up to the right. Then click "Submit" at the bottom of the screen.

RANK	NAME	FAVORITE IMAGE
Species	Camponotus pennsylvanicus	<input type="text"/>
Species	Camponotus planatus	<input type="text"/>
Species	Camponotus sansabeanus	<input type="text"/>
Species	Camponotus sayi	<input type="text"/>
Species	Camponotus semitestaceus	<input type="text"/>
Species	Camponotus snellingi	<input type="text"/>
Species	Camponotus texanus	CASENT0104764
Species	Camponotus ulcerosus	<input type="text"/>
Species	Camponotus vicinus	<input type="text"/>
Genus	Cardiocondyla	<input type="text"/>
Species	Cardiocondyla emeryi	<input type="text"/>
Species	Cardiocondyla mauritanica	<input type="text"/>
Species	Cardiocondyla minutior	<input type="text"/>

Note: no matter which image is chosen for that specimen, the head, dorsal, profile or label image will provide the same CASENT number for that specimen.

- Click on screen icon to view the species page for your region with the chosen images.

Species Camponotus semitestaceus	<input type="text"/>
Species Camponotus snellingi	<input type="text"/>
Species Camponotus texanus	CASENT0104764
Species Camponotus ulcerosus	<input type="text"/>
Species Camponotus vicinus	<input type="text"/>
Genus Cardiocondyla	<input type="text"/>
Species Cardiocondyla emeryi	<input type="text"/>

- When all images are chosen for your region, click **Submit**.
